I've bought some quality feed for the sick & injured horses on your behalf!

Without good quality feed, hot mashes, build-up breakfasts, lots of hay and the vitality of daily, fresh, greens, the outcomes of EEA horses and donkeys would be very poor indeed.

Recovery from illness needs a proper diet of the best quality possible.

In addition to feeding the patients, day visitors need a good meal too, possibly the only one they will get until their next visit. This gift makes that possible.
